

SokaSoko — ACADEMY Subscription Test Script (Internal)

Version 1.0 · Internal QA

What you're testing

ACADEMY subscription with three tiers, an automatic 30-day auto-Gold onboarding trial, roster composition gates (age level + gender), and extensions to the trial/tournament/scout-request/scout-add/report-request/media enforcement points to fire for ACADEMY organizers/creators. Home-feed post cap (homeFeedPosts) is a new metered feature.

Prerequisites

- Android device on the latest internal build.
- Multiple ACADEMY test accounts: one <30 days old, one >30 days old with no subscription, one on Gold, one on Platinum.
- At least three PLAYER accounts spanning two age brackets and both genders for the roster tests.
- Backend + Render log access.

Environment

- Backend: <https://sokasoko.onrender.com> — commit 9c63331 or later on main.
- Mobile: sokasoko-mobile commit 27dea97 or later.
- Constants: ACADEMY_TRIAL_DAYS=30. Feature keys: reportsGenerated, playerQueries, homeFeedPosts (all on SubscriptionUsage).

Test cases

1. Onboarding trial

- GET /v1/subscriptions/me?userId=&userType;=ACADEMY.

Expected: academyStatus.tier='GOLD', trialActive=true, trialEndsAt=. Effective tier is Gold even without a Subscription record. getEffectiveTier promotes.

2. Post-trial Standard

- Same GET on an ACADEMY >30 days old, no active Subscription.

Expected: academyStatus.tier='STANDARD', trialActive=false. All Standard caps apply.

3. Catalog pricing

- GET /v1/subscriptions/catalog and inspect prices.ACADEMY.

Expected: Standard 0/0/0. Gold 20k/50k/100k. Platinum 50k/120k/200k.

4. Roster composition — age level cap

- As Standard ACADEMY, POST /v1/academys with playerId=, level=U15.
- Follow with POST containing playerId=, level=U13.

Expected: First: 201 enrollment created. Second: error 'Kifurushi cha STANDARD kinaruhusu makundi ya umri 1 tu.' On Gold: up to 3 distinct levels allowed. Platinum: unlimited.

5. Roster composition — gender mix

- As Standard ACADEMY, add a Male player, then a Female player at the same level.

Expected: Second call: error 'Kifurushi cha STANDARD kinaruhusu jinsia moja tu kwenye roster.' Gold + Platinum: both accept (mixedGender=true).

6. POST /v1/trials — Standard blocked

- Post-trial Standard ACADEMY POSTs a trial with organizer=self.

Expected: 403 ACADEMY_TRIAL_CREATION_BLOCKED. Gold + Platinum: 201.

7. Team-based trial cap on Gold

- As Gold ACADEMY, POST a trial with trialFor='Academies' and maxParticipants=8.
- Repeat with maxParticipants=9.

Expected: First: 201. Second: 403 ACADEMY_TRIAL_TEAM_LIMIT, maxTeamBasedTrialTeams=8. Platinum: 201 either way. Player-based trials (trialFor='Players') are NOT capped.

8. Tournament team cap

- As Gold ACADEMY, POST /v1/tournaments with maxTeams=8. Then maxTeams=9.

Expected: Gold: first 201, second 403 ACADEMY_TOURNAMENT_TEAM_LIMIT. Platinum: 201 either way. Standard: 403 ACADEMY_TOURNAMENT_CREATION_BLOCKED.

9. Scout request from ACADEMY

- As Standard ACADEMY on a match you own, POST /v1/matches/:id/request-scout.

Expected: 403 ACADEMY_SCOUT_REQUEST_BLOCKED. Gold + Platinum: 200 if the scout is subscribed.

10. Add scouts to own matches

- As Standard ACADEMY, POST /v1/matches with scouts:[] and scheduledBy=self.

Expected: 403 ACADEMY_ADD_SCOUT_BLOCKED. Gold + Platinum: 201, subject to the scout's own eligibility.

11. Report generation — type gating

- Gold ACADEMY POST /v1/report-requests with reportType=PLAYER.
- Gold ACADEMY POST with reportType=TEAM.
- Platinum ACADEMY POST with reportType=MARKET.

Expected: Gold PLAYER: 201, reportsGenerated counter increments. Gold TEAM: 403 ACADEMY_REPORT_TYPE_BLOCKED. Platinum any type: 201.

12. Reports monthly cap

- Gold ACADEMY runs 10 PLAYER report requests in one month.
- 11th request.

Expected: First 10: 201 each. 11th: 429 MONTHLY_CAP, cap=10. Platinum: no cap.

13. Home-feed post cap

- Standard ACADEMY POST /v1/medias 6 times in one month.
- Gold ACADEMY POST 26 times.
- Platinum: unlimited.

Expected: Standard 6th: 429 with cap=5. Gold 26th: 429 with cap=25. Platinum: no cap. Non-ACADEMY creators unaffected (middleware early-returns).

14. Server accepts client-picked tier for ACADEMY POST /v1/subscriptions

- POST /v1/subscriptions with userType=ACADEMY and tier=PLATINUM.

Expected: 201 honoured. Unlike REFEREE (server derives from DOB) and SCOUT (server forces PRO), ACADEMY respects client-provided tier — matches COACH behaviour.

15. Mobile subscription screen

- Log in as ACADEMY in each state (<30d trial, post-trial Standard, active Gold, active Platinum).

Expected: Trial state: green banner + Gold tier card. Standard: no banner, shorter bullet list. Gold/Platinum: full bullet list including reach scope, doc-vetting inclusion (Platinum only), advanced analytics + monthly academy report + featured placement (Platinum only).

16. Mobile usage bars

- As Gold ACADEMY that has consumed some AI + reports + posts, open Uandikishaji.

Expected: 'Matumizi ya mwezi huu' card shows four rows where applicable: AI Ismaili, Ripoti zilizotengenezwa, Utafutaji wa wachezaji, Posts kwenye home feed — each with used/cap.

17. Non-ACADEMY accounts unaffected

- Log in as PLAYER, REFEREE, SCOUT, COACH; open Uandikishaji.

Expected: Their existing flows unchanged. No regressions on media POST, trial POST, tournament POST, or report_request POST for callers with user.type != 'ACADEMY'.

How to report a bug

Field	Example
Test case #	4 — Roster age level cap
Device / OS	Pixel 6a · Android 14
App version	1.0.1+14
Backend commit	9c63331
Account (type + number)	ACADEMY · TFH-A-A000005
Endpoint (if backend)	POST /v1/academys
Expected	Second player rejected with tier error
Actual	Second player accepted
Screenshot / repro	attached
Render log excerpt	attached

Known limitations (not bugs)

- Doc Vetting is defined on Platinum caps but the service itself (order model, payment, review queue) is a separate build — see project_doc_vetting_service memory.
- Advanced analytics + Monthly academy report caps are set but no UI/generator ships yet.
- Featured placement in home feed is not enforced by the feed sampler — see project_home_feed_paid_bias memory.
- Nation-wide vs regional reach for trials/tournaments has cap fields but no listing-side filter is applied yet.
- Payment gateway not wired; paid subs stay PENDING until admin activation.

- Downgrade to Standard does not auto-cancel the previously-active paid Subscription row.
- ACADEMY roster composition check runs on every player-add — has $O(N)$ cost per add. Fine at expected sizes; revisit if academies routinely exceed 200 players.
