

SokaSoko — CLUB Subscription Test Script (Internal)

Version 1.0 · Internal QA

What you're testing

CLUB subscription — three PAID tiers (Standard is not free), plus a 30-day auto-Gold onboarding trial. Feature caps mirror ACADEMY 1:1 for the launch. All existing organizer gates (trials, tournaments, matches, request-scout, report-request, media) have been extended to include CLUB alongside COACH and ACADEMY.

Prerequisites

- Android device on the latest internal build.
- Multiple CLUB test accounts: one <30 days old (trial), one >30 days with no subscription, one on active Standard, one on Gold, one on Platinum.
- Team-owner counterparts to test cross-tier interactions where relevant.
- Backend + Render log access.

Environment

- Backend: <https://sokasoko.onrender.com> — commit 65569c8 or later on main.
- Mobile: sokasoko-mobile commit 9ae2ebe or later.
- Constants: CLUB_TRIAL_DAYS=30. Enforcement gates reused: /trials, /tournaments, /matches, /matches/:id/request-scout, /report-requests, /medias.

Test cases

1. Catalog pricing shape

- GET /v1/subscriptions/catalog and inspect prices.CLUB.

Expected: Standard 20k/50k/100k. Gold 50k/120k/200k. Platinum 100k/250k/500k. All three tiers have non-zero prices (unlike other user types where Standard is 0).

2. Onboarding trial

- GET /v1/subscriptions/me?userId=&userType;=CLUB.

Expected: clubStatus.tier='GOLD', trialActive=true, trialEndsAt=. getEffectiveTier returns 'GOLD' via the trial branch.

3. Post-trial without subscription

- Same GET on a CLUB >30 days old with no active Subscription.

Expected: clubStatus.tier='STANDARD', trialActive=false. Standard caps apply — but because no Subscription record exists, callers hit the Standard tier restrictions immediately.

4. Server accepts client-picked tier for CLUB

- POST /v1/subscriptions with userType=CLUB and tier=STANDARD (paid tier).
- Same with tier=GOLD, tier=PLATINUM.
- tier='FAKE'.

Expected: All three real tiers: 201 with matching amount. Bad tier: 400 invalid tier.

5. Trial creation gate

- Post-trial Standard CLUB POSTs /v1/trials with organizer=self.

Expected: 403 CLUB_TRIAL_CREATION_BLOCKED. Gold + Platinum: 201.

6. Team-based trial cap on Gold

- Gold CLUB POST trial with trialFor='Academies', maxParticipants=8.
- Repeat with maxParticipants=9.

Expected: 8: 201. 9: 403 CLUB_TRIAL_TEAM_LIMIT, maxTeamBasedTrialTeams=8. Platinum: 201 either way.

7. Tournament creation + team cap

- Standard CLUB POST /v1/tournaments.
- Gold CLUB POST with maxTeams=9.
- Platinum CLUB POST with maxTeams=100.

Expected: Standard: 403 CLUB_TOURNAMENT_CREATION_BLOCKED. Gold 9: 403 CLUB_TOURNAMENT_TEAM_LIMIT (cap=8). Gold 8: 201. Platinum: 201 regardless of maxTeams.

8. Match scout-add

- Standard CLUB POST /v1/matches with scouts:[] and scheduledBy=self.

Expected: 403 CLUB_ADD_SCOUT_BLOCKED. Gold + Platinum: 201 subject to scout's own eligibility.

9. Request scout

- Standard CLUB on a match they own, POST /v1/matches/:id/request-scout.

Expected: 403 CLUB_SCOUT_REQUEST_BLOCKED. Gold + Platinum: proceeds to the scout's eligibility check (which must also pass).

10. Report generation — type gate

- Gold CLUB POST /v1/report-requests with reportType=PLAYER.
- Gold CLUB with reportType=TEAM.
- Platinum CLUB with reportType=MARKET.

Expected: Gold PLAYER: 201. Gold TEAM: 403 CLUB_REPORT_TYPE_BLOCKED. Platinum any type: 201.

11. Reports monthly cap

- Gold CLUB runs 10 PLAYER report requests in one month.
- 11th request.

Expected: First 10: 201. 11th: 429 MONTHLY_CAP, cap=10, tier='GOLD'. Platinum: no cap.

12. Home-feed post cap

- Standard CLUB POST /v1/medias 6 times in one month.

Expected: 6th: 429 with cap=5. Gold: 26th post 429 with cap=25. Platinum: no cap. The middleware only meters ACADEMY + CLUB creators; other types pass through.

13. Mobile — CLUB body renders through _buildOrgBody

- Log in as CLUB in each state and open Uandikishaji.

Expected: Trial: green banner + Gold card. Post-trial: Standard card + Standard shows in upgrade list (unlike ACADEMY where Standard is free). No 'Rudi Standard (bure)' button — CLUB Standard isn't free, so downgrade path is hidden.

14. Usage card content

- As Gold CLUB that has consumed AI + reports + posts, open Uandikishaji.

Expected: 'Matumizi ya mwezi huu' card shows four metered rows: AI Ismaili, Ripoti zilizotengenezwa, Utafutaji wa wachezaji, Posts kwenye home feed. All with used/cap.

15. Non-CLUB accounts unaffected

- Log in as PLAYER, REFEREE, SCOUT, COACH, ACADEMY; open Uandikishaji.

Expected: Each shows their existing flow. Middleware early-returns on non-CLUB creators/organizers so there are no regressions.

16. Roster composition NOT enforced yet for CLUB

- Attempt to add players to a CLUB via any existing endpoint that assumes CLUB rosters.

Expected: No endpoint exists — CLUB rosters aren't tracked via /v1/academys (which is Academy-only). The maxAgeLevels + mixedGender caps sit in FEATURE_CAPS.CLUB but nothing consumes them yet. Will kick in when the CLUB roster endpoint ships.

How to report a bug

Field	Example
Test case #	7 — Tournament team cap
Device / OS	Pixel 6a · Android 14
App version	1.0.1+14
Backend commit	65569c8
Account (type + number)	CLUB · TFH-CL-A000003
Endpoint (if backend)	POST /v1/tournaments
Expected	403 CLUB_TOURNAMENT_TEAM_LIMIT (cap=8)
Actual	201 tournament created with maxTeams=20
Screenshot / repro	attached
Render log excerpt	attached

Known limitations (not bugs)

- CLUB roster composition (maxAgeLevels / mixedGender) has cap fields set but no endpoint consumes them yet. Waiting on the CLUB roster feature build.
- CLUB Standard is paid, so an unsubscribed CLUB (post-trial) has less effective access than an unsubscribed COACH/ACADEMY (whose Standard is free).
- Doc-Vetting bundled on Platinum but service itself not built — see project_doc_vetting_service memory.
- Featured placement / advanced analytics / monthly club report / nation-wide reach: cap fields present but no consumer.
- Payment gateway not wired; paid subs stay PENDING until admin activation.
- Downgrade to Standard flow hidden for CLUB (Standard is paid); if a Gold/Platinum CLUB wants to move to Standard, they subscribe to Standard explicitly.
