

SokaSoko — AGENT Subscription Test Script (Internal)

Version 1.0 · Internal QA

What you're testing

AGENT subscription — two-paid-tier model (Gold + Enterprise). Standard exists on the enum as the locked-out state (all cap flags false/0), so an unsubscribed AGENT past the trial has no platform features. 30-day auto-Gold onboarding trial. Enterprise pricing is negotiated per account — subscribe request submits a PENDING sub with amount 0 and admin activates offline. Gold gets PLAYER reports only; Enterprise adds TEAM + MARKET + CUSTOM analysis. Agent add/remove player is not tier-gated per product spec.

Prerequisites

- Backend commit 17e87a6 or later on main (AGENT tier landed).
- Multiple AGENT test accounts: one <30 days (trial), one >30 days no sub, one on active Gold, one on Enterprise.
- Admin access to activate Enterprise contact requests.
- Backend + Render log access.

Environment

- Backend: <https://sokasoko.onrender.com>.
- Mobile: sokasoko-mobile commit 41cc402 or later.
- Constants: AGENT_TRIAL_DAYS=30. reportType enum includes CUSTOM (Enterprise-only for AGENT).
- PRICES.AGENT.ENTERPRISE = all null (contact-us marker).

Test cases

1. Catalog shape

- GET /v1/subscriptions/catalog and inspect prices.AGENT + features.AGENT.

Expected: Standard: 0/0/0 (locked-out). Gold: 100k/250k/500k TSh (M/Q/B). Enterprise: all null. Feature caps present for all three tiers with canGenerate* fields (PlayerReport, TeamReport, MarketReport, CustomAnalysis), reachScope, advancedAnalytics, featuredPlacement etc.

2. Onboarding trial

- GET /v1/subscriptions/me?userId=&userType;=AGENT.

Expected: agentStatus.tier='GOLD', trialActive=true, trialEndsAt=. Effective tier=GOLD via getEffectiveTier trial branch.

3. Post-trial locked state

- Same GET on AGENT >30 days old with no active Subscription.

Expected: agentStatus.tier='STANDARD', trialActive=false. All caps flags false/0. Any downstream check hits FEATURE_CAPS.AGENT.STANDARD which grants nothing.

4. Trial creation gate

- As Standard AGENT (post-trial), POST /v1/trials with organizer=self.
- As Gold AGENT, same.
- As Enterprise AGENT, same.

Expected: Standard: 403 AGENT_TRIAL_CREATION_BLOCKED. Gold: 201. Enterprise: 201.

5. Report type gate — Gold PLAYER only

- Gold AGENT POST /v1/report-requests with reportType=PLAYER.
- Gold AGENT POST with reportType=TEAM.
- Gold AGENT POST with reportType=MARKET.
- Gold AGENT POST with reportType=CUSTOM.

Expected: PLAYER: 201, reportsGenerated counter increments. TEAM / MARKET / CUSTOM: 403 AGENT_REPORT_TYPE_BLOCKED.

6. Report type gate — Enterprise all types

- Enterprise AGENT POST for each of PLAYER, TEAM, MARKET, CUSTOM.

Expected: All 201. Enterprise has canGeneratePlayerReport, canGenerateTeamReport, canGenerateMarketReport, canGenerateCustomAnalysis = true.

7. Reports monthly cap (Gold)

- Gold AGENT submits 10 PLAYER report requests in one month.
- 11th request.

Expected: First 10: 201. 11th: 429 MONTHLY_CAP cap=10 tier=GOLD. Enterprise: no cap.

8. Request scout gate

- Standard AGENT on a match POSTs /v1/matches/:id/request-scout.
- Gold AGENT, same.

Expected: Standard: 403 AGENT_SCOUT_REQUEST_BLOCKED. Gold + Enterprise: passes tier gate then respects the target scout's own eligibility check.

9. Home-feed post cap

- Standard AGENT POST /v1/medias 6 times in one month.
- Gold AGENT POST 26 times.

Expected: Standard: post 6 → 429 cap=0 (Standard has homeFeedPostsPerMonth=0 in the caps). Gold: 26th → 429 cap=25. Enterprise: unlimited. Middleware early-returns on non-METERED_POST_TYPES creators.

10. Server-forced Enterprise flow

- POST /v1/subscriptions with userType=AGENT, tier=ENTERPRISE, plan=MONTHLY.

Expected: 201 with amount=0 (contact-us marker; PRICES.AGENT.ENTERPRISE.MONTHLY.TZS is null and the subscribe route substitutes 0). Notes field captures the contact reason if the client supplied one. Admin activates offline after quoting a price.

11. Server rejects invalid tier

- POST with tier='STANDARD'.
- POST with tier='PLATINUM'.
- POST with tier='FAKE'.

Expected: STANDARD is technically valid on the enum but has no useful features — creates a PENDING sub that grants no elevation once activated. PLATINUM: 400 (AGENT tier catalog only offers Standard/Gold/Enterprise). FAKE: 400.

12. Player roster (not gated)

- As Gold AGENT, add a PLAYER to your roster (existing agent-player flow).
- Also as Standard/no-sub AGENT.

Expected: Add/remove flow works regardless of tier — user's product spec: 'stays as is'. Player consent flow still fires.

13. Mobile — trial banner

- As <30-day AGENT, open Uandikishaji.

Expected: Green trial banner + Gold tier card. Two upgrade cards: Gold (if not already on it) and Enterprise (contact-us). No 'Rudi Standard' button (no free fallback).

14. Mobile — locked banner

- As post-trial Standard AGENT, open Uandikishaji.

Expected: Red 'Akaunti imezuiliwa' banner above tier card. Tier card shows 'Hakuna vipengele — jisajili ili kufikia'. Two upgrade cards visible.

15. Mobile — Enterprise indigo card

- Any AGENT open Uandikishaji.

Expected: Enterprise card has deep-indigo accent + diamond icon, distinct from the brand-brown Gold card. Tap opens confirm dialog explaining contact flow.

16. Non-AGENT accounts unaffected

- Log in as PLAYER / COACH / ACADEMY / etc.

Expected: Their respective flows unchanged. No regressions on report request POST for non-AGENT callers (utype branch scoped to AGENT/COACH/ACADEMY/CLUB).

How to report a bug

Field	Example
Test case #	5 — Report type gate
Device / OS	Pixel 6a · Android 14
App version	1.0.1+14
Backend commit	17e87a6
Account	AGENT · TFH-AG-A000005
Endpoint	POST /v1/report-requests
Expected	TEAM report → 403 AGENT_REPORT_TYPE_BLOCKED
Actual	TEAM report → 201 accepted
Screenshot / repro	attached
Render log excerpt	attached

Known limitations (not bugs)

- CUSTOM report type is enum-valid but has no dedicated generator — routes through the standard report_request pipeline which produces the same PDF format. A bespoke analysis generator is a separate build.

- Advanced analytics + monthly agent report Enterprise flags have no UI/consumer yet.

- Featured placement in home feed relies on the paid-tier bias algorithm — see project_home_feed_paid_bias memory.

- Enterprise pricing is presented as 'contact us' — no automated quoting; admin manually sets the amount when activating.

- Payment gateway not wired; paid subs stay PENDING until admin activation.
- Placeholder phone numbers in `_paymentInstructions()` must be swapped for real merchant numbers before external testers.
