

SokaSoko — COACH Subscription Test Script (Internal)

Version 1.0 · Internal QA

What you're testing

COACH subscription with three tiers (Standard/Gold/Platinum), an automatic 30-day onboarding trial that promotes new Standard coaches to Gold, and a coach-scout bridge that lets Gold/Platinum coaches perform official scouting without a separate SCOUT PRO subscription. Enforcement is wired into report generation (types + monthly cap), trial creation, tournament creation (+ team-count cap on Gold), and adding scouts to your own matches.

Prerequisites

- Android device on the latest internal build.
- Multiple COACH test accounts: one <30 days old (trial), one >30 days old (Standard), one with an ACTIVE Gold subscription, one with Platinum.
- ACADEMY/CLUB/SCHOOL account for creating matches to test scout-add.
- PLAYER account as a target for report requests.
- Backend and Render log access.

Environment

- Backend: <https://sokasoko.onrender.com> — commit 5d4f5b5 or later on main.
- Mobile: sokasoko-mobile commit 54e474d or later.
- Constants: COACH_TRIAL_DAYS=30. reportsGenerated feature key on SubscriptionUsage.

Test cases

1. Onboarding trial — effective tier is Gold

- GET /v1/subscriptions/me?userId=&userType;=COACH.

Expected: coachStatus.tier='GOLD', trialActive=true, trialEndsAt=. Response tier is 'GOLD' even though no Subscription record exists. getEffectiveTier promotes automatically.

2. Post-trial coach without subscription

- Same GET on a COACH >30 days old, no active Subscription.

Expected: coachStatus.tier='STANDARD', trialActive=false. All Standard caps apply.

3. AI enforcement via existing SubscriptionUsage.consume

- As a Standard COACH, send Ismaili AI queries until 30 are used.
- 31st query.

Expected: 31st query returns 429 MONTHLY_CAP. Trial-Gold coach caps at 200. Platinum unlimited with 30/hr, 300/day fair-use.

4. POST /v1/report-requests — type gating

- Standard COACH POST with reportType=PLAYER.
- Gold COACH POST with reportType=TEAM.
- Gold COACH POST with reportType=MARKET.
- Platinum COACH POST with each of the three types.

Expected: Standard: 403 COACH_REPORT_TYPE_BLOCKED. Gold TEAM/MARKET: 403 same reason. Gold PLAYER: 201, meter increments. Platinum: 201 for all types.

5. POST /v1/report-requests — monthly cap

- As a Gold COACH, submit 10 PLAYER report requests in one month.
- 11th request.

Expected: First 10: 201 each, reportsGenerated counter increments 1..10. 11th: 429 with reason='MONTHLY_CAP', cap=10, tier='GOLD'. Platinum: no cap.

6. POST /v1/trials — Standard blocked

- As a post-trial Standard COACH, POST /v1/trials with organizer=.

Expected: 403 COACH_TRIAL_CREATION_BLOCKED. Gold: 201. Platinum: 201.

7. POST /v1/tournaments — team cap on Gold

- As Gold COACH, POST /v1/tournaments with maxTeams=8. Then with maxTeams=9.
- As Platinum COACH, same test with maxTeams=200.

Expected: Gold maxTeams=8: 201. Gold maxTeams=9: 403 COACH_TOURNAMENT_TEAM_LIMIT, maxTournamentTeams=8. Platinum: 201 either way.

8. POST /v1/matches — Standard COACH cannot add scouts

- As a Standard COACH, POST /v1/matches with scouts:[] and scheduledBy=self.

Expected: 403 COACH_ADD_SCOUT_BLOCKED. Gold/Platinum: match created (subject to the scout's own eligibility check).

9. Coach-Scout bridge (canPerformOfficialScouting)

- As a team-owner, POST /v1/matches with scouts:[].
- Same with a Standard COACH id in scouts:[].
- Standard COACH tries POST /v1/scout-reports.

Expected: Gold coach in scouts array: 201 match created. Standard COACH in scouts: 403 SCOUT_SUBSCRIPTION_REQUIRED. Standard COACH filing a report: 403 same.

10. Server-forced tier for COACH POST /v1/subscriptions

- POST /v1/subscriptions with userType=COACH and tier=PLATINUM in body.
- POST with tier='FAKE'.

Expected: First: 201, honoured because client-picked tier is respected for COACH (unlike REFEREE where server derives from DOB, or SCOUT where server forces PRO). Second: 400 invalid tier. This is intentional — COACH price is coach's own choice.

11. Mobile subscription screen — trial banner

- As a <30-day COACH, open Uandikishaji.

Expected: Green banner at top reads 'Kipindi cha majaribio — Kifurushi cha Gold bila malipo hadi '. Tier card below shows Gold bullets. Two upgrade cards (Gold, Platinum) still render — Standard has no path to 'upgrade to Standard'.

12. Mobile — post-trial Standard view

- As a >30-day Standard COACH, open Uandikishaji.

Expected: No banner. Tier card shows Standard with the short bullet list. Upgrade cards for Gold + Platinum with monthly prices. No usage card (Standard has nothing metered that isn't a hard-zero cap).

13. Mobile — Gold view with usage bars

- Log in as Gold COACH. Send a few AI queries and submit a report first.
- Open Uandikishaji.

Expected: Tier card shows Gold bullets. 'Matumizi ya mwezi huu' card lists three rows: AI Ismaili N/200, Ripoti zilizotengenezwa N/10, Player queries N/20. Progress bars reflect the counters.

14. Downgrade to Standard

- As Gold or Platinum COACH, scroll to bottom, tap 'Rudi Standard (bure)'.

Expected: Confirm dialog. On confirm, POST /v1/subscriptions with tier=STANDARD auto-activates. Effective tier flips to STANDARD immediately. Previously-active paid Subscription row is NOT auto-cancelled — admin should CANCEL manually if needed (known limitation).

15. Non-COACH accounts unaffected

- Log in as PLAYER, REFEREE, SCOUT; open Uandikishaji.

Expected: Their respective flows unchanged. No regressions in report generation for non-coach callers (report_request tier gate scoped to user.type === 'COACH').

How to report a bug

Field	Example
Test case #	7 — tournament team cap
Device / OS	Pixel 6a · Android 14
App version	1.0.1+14
Backend commit	5d4f5b5
Account (type + number)	COACH · TFH-C-A000015
Endpoint (if backend)	POST /v1/tournaments
Expected	403 COACH_TOURNAMENT_TEAM_LIMIT
Actual	201 tournament created with maxTeams=20
Screenshot / repro	attached
Render log excerpt	attached

Known limitations (not bugs)

- 30-day trial starts from user.createdAt — no admin override for extending or shortening.
- Featured placement, Advanced analytics, Nation-wide reach: backend caps are set but no consuming UI/algorithm changes ship yet. See project_home_feed_paid_bias memory.
- Multi-team management (maxManagedTeams) is defined on caps but enforcement not wired — needs product decision on where team assignment happens.

- Player-request feature gate: cap field canUsePlayerRequests is set but the feature doesn't exist as a distinct endpoint yet; will kick in when it ships.
- Payment gateway not wired; paid subs stay PENDING until admin activation.
- Downgrade to Standard does not auto-cancel the previously-active paid Subscription row.
